EDUCATION

Bachelor's Degree in Mathematical Sciences & Computer Sciences

University of Khartoum

Graduated December 2021

TECHNICAL SKILLS

Python | JavaScript | SQL | Odoo 13–19 | OWL | Django | Flask | REST APIs | OAuth2 | PostgreSQL | MySQL | Docker | Kubernetes | Linux | Nginx | CI/CD | GitHub Actions | AWS | Firebase | Flutter | HTML/CSS | XML/QWeb | Portainer

CORE STRENGTHS

- ERP implementation and customization
- Business analysis and workflow automation
- API and system integration
- Database design and troubleshooting
- Linux infrastructure and deployment
- Testing, CI/CD and documentation
- Security-aware application design

LANGUAGES

ABDULLA BASHIR

ERP • PYTHON • INTEGRATIONS • CLOUD • AUTOMATION • SECURITY

PROFESSIONAL PROFILE

Enterprise solutions and software engineer with 5+ years of experience across Odoo ERP, Python backend development, business-process automation, REST API integrations, database-driven applications and Linux infrastructure. Delivers solutions spanning requirements analysis, custom development, migration, testing, deployment and production support. Combines hands-on engineering with a business-first approach to reliability, maintainability, access control and operational efficiency.

SELECTED ACHIEVEMENTS

- **Property management digital transformation:** Built a property platform from the ground up for long-term use, covering properties, unit categorization, contracts, tenant maintenance, PDC cheques, multi-company operations and audit logging.
- **Measurable cost reduction:** Delivered attendance and leave-request integration addressing a recurring issue estimated to cost approximately **SAR 4,000 per month**.
- **Saudi HR integration:** Built a B2B API integration to exchange employee attendance and worked-hours data with Saudi Ministry of Human Resources services.
- **Infrastructure consolidation:** Operated nine Linux/Odoo server instances on one machine using Docker, reverse proxying, subdomains and deployment tools.
- **Odoo modernization:** Worked on major upgrades including v12→v16, v15→v17 and v16→v17, alongside custom modules, OWL interfaces, reporting and production support.
- **Cybersecurity-oriented tool:** Ported a Go information-gathering utility to Python and developed Django REST functionality for cleaned and translated Arabic keyword processing.
- **Healthcare platforms:** Developed healthcare workflows across Odoo and Flutter/Firebase projects, including Ekram Medical, Badria Dermatology, MediBook and ClinicFlow.
- **Offline Islamic mobile app:** Extended a prayer-time application with bundled Qur'an content, prayer calculations, Athan reminders, Qibla compass and Hijri calendar features; contributed automated build and test workflows.
- **AI solution architecture:** Designed an Agentic RAG architecture using Azure Functions, Blob Storage, Document Intelligence, Azure OpenAI, AI Search, Cosmos DB, Next.js and CI/CD, including Arabic/English document processing and hybrid retrieval.
- **Business automation:** Delivered Odoo POS, payroll, finance, contract invoicing, inventory, API and PostgreSQL-backed workflow solutions.

Arabic — Native

English — Intermediate (spoken and written)

SELECTED LEARNING & CERTIFICATIONS

- Introduction to Linux — The Linux Foundation
- Introduction to Kubernetes — The Linux Foundation
- Kubernetes Cloud Native Essentials — The Linux Foundation
- AWS Cloud Technical Essentials / Architecting on AWS
- Cybersecurity Foundations and Network Security — ISC2 learning
- Backend Development — Meta
- Python & Flask
- Linux and DevOps learning paths

PROFESSIONAL EXPERIENCE

Python Developer — Freelance

Oct 2025 – Present

Freelance • Python Backend • Odoo Integration • Infrastructure

- Upgrade and maintain Odoo applications and custom modules, following controlled development and release practices.
- Build Python REST APIs and integrate Odoo modules and business workflows across applications.
- Work with PostgreSQL, Docker and Linux server configuration to support reproducible deployments and troubleshoot application issues.

IT Application Developer — Al Taaluq Contracting & Maintenance WLL

Sep 2024 – Present

Qatar • Business Applications & Digital Transformation

- Designed and built a property-management application from scratch, including property/unit records, rental contracts, tenant maintenance tracking and post-dated cheque management.
- Implemented multi-company operation and audit logging to improve traceability, data governance and operational control.
- Translated business requirements into maintainable application workflows and supported database, deployment and production troubleshooting.
- Used Docker, Linux, Nginx Proxy Manager and Portainer to manage application environments.

Odoo Technical Advisor / Developer — Contract Engagements

2024 – 2025

Odoo Architecture • Upgrades • Technical Guidance

- Advised on Odoo implementation, custom-module design, migration risks, integrations and production troubleshooting.
- Supported Odoo upgrades, including migration planning and compatibility checks for custom modules and business workflows.
- Helped teams translate operational requirements into practical ERP configuration and development tasks.

IT Supervisor / Developer — Al Narjis Real Estate

2024 – 2025 · Project/engagement experience

Real Estate Systems • Application Support

- Worked across application development and IT operations for real-estate workflows, emphasizing property data, business processes and reliable system support.
- Applied Odoo/Python and infrastructure skills to improve application maintainability and operational visibility.

Odoo Developer — Maven Technology

Aug 2023 – Aug 2024

Qatar • ERP Development & Deployment

- Customized and upgraded Odoo systems, including v15 → v17 work for client business workflows.
- Developed OWL-based reporting/user interfaces and inventory bundle assembly/disassembly functionality.
- Used PostgreSQL CLI for troubleshooting and deployed applications with Docker, Nginx Proxy Manager and Portainer.

Freelance Odoo Developer — Al Hulool Soft

Sep 2022 – Sep 2023

Saudi Arabia • Remote

- Deployed and maintained Odoo community environments and managed nine Linux/Odoo instances with Docker and reverse-proxy routing.
- Developed dental-clinic and rental-car management features, contract-payment invoicing, XML reports and Python payroll fixes.

Odoo Developer — Ingaz Group

Jan 2022 – Nov 2022

Saudi Arabia • ERP & Government API Integration

- Built custom Odoo modules and a B2B integration for employee attendance/worked-hours data exchange with Saudi HR services.
- Automated leave-management processes and configured Nginx reverse proxy and firewall controls.

Odoo Technical Developer — AutoBash Co. Ltd

Sep 2018 – Sep 2019

Sudan • Application Support

- Provided Odoo technical support, investigated application issues and implemented fixes to help maintain business continuity.

Freelance Software & Infrastructure Developer

Project-based / ongoing

Remote • Web, API, mobile and deployment projects

- Delivered Python/Django/Flask APIs, Odoo integrations, database-backed web applications, mobile-app features and Linux/Docker deployment support.
- Built and maintained portfolio projects in healthcare, Islamic utilities, POS printing, automation and cybersecurity-oriented information processing.
- Updated the AndroidPrayerTimesApp mobile branding by configuring the supplied artwork for the launcher icon and splash screen across Android (including Android 12+) and iOS, and registering the required assets in the Flutter project.

SELECTED PROJECTS

- **Property Management:** Properties, units, contracts, maintenance, PDCs, audit logs and multi-company operation.
- **Odoo POS Arabic Printer:** Odoo POS + Python local bridge for Arabic/English 80mm thermal receipt printing.
- **Ekram Medical:** Odoo 18 medical-center system with reception, appointments, consultations, laboratory and role-based workflows.
- **MediBook / ClinicFlow:** Arabic-first Flutter/web healthcare scheduling, patient and appointment workflows.
- **Salawat / Prayer Times:** Offline Qur'an, prayer times, Athan alerts, Qibla and Hijri calendar.
- **Cybersecurity Information Tool:** Python/Django REST API with Arabic keyword processing.
- **Odoo Upgrade Engagements:** Multi-version migrations, module adaptation and operational validation.
- **Agentic RAG:** Azure-based bilingual document understanding and retrieval architecture.
- **Petro Integration API:** Odoo fuel sales and tank-measurement workflows.

ENGINEERING FOCUS

- Odoo ORM, custom modules, OWL, XML/QWeb, POS, payroll, finance and inventory workflows.
- Python services, Django/Flask, REST APIs, OAuth2 and system integration.
- PostgreSQL/MySQL, SQL troubleshooting, data integrity and reporting.
- Docker, Linux, Nginx, Portainer, Kubernetes fundamentals and CI/CD.
- Flutter/mobile development, offline-first data and GitHub Actions workflows.
- Security-conscious access control, secrets handling and application reliability.

VOLUNTEER EXPERIENCE

Red Crescent Qatar — Fruitful Giving | Mar 2025 – Apr 2025 — Supported logistics by categorizing and packing donated clothing into age-based containers. Also participates in AI and cybersecurity learning communities.

This resume summarizes employment, contract and project-based experience. Some engagements overlapped; dates and engagement labels are shown where known. Project descriptions avoid confidential client information.
